

EUROPEAN CONFERENCE

A3TS / AWT / AIM / SVW-ASTT / VWT / ASMET / ATZK

COMBINED TREATMENTS TO IMPROVE SURFACE PROPERTIES

22-23/03/2012

Palais des Congrès de STRASBOURG

1st ANNOUNCEMENT AND CALL FOR PAPERS

Manufacturing process optimization and cost control are the two main goals of engineers and technicians in charge of materials engineering. They must reconcile with precision the best usage properties of parts with the right choice of thermal and surface treatments.

But are they really aware of the potential of combined treatments, often called duplex, which are immensely promising, often unknown and yet can improve resistance to aggressive chemical, thermal and mechanical environments while also limiting costs?

The objective of this European Conference is to take stock of the latest advances in the field and discover the new possibilities offered thanks to the improved precision of these treatments, the progress of their modelling and the innovations contributed by the worlds of academic research and industry.

In this context, combined treatments - both thermal and surface treatments – open up very interesting avenues to combat chemical, thermal and mechanical aggression while also optimizing costs.

Send your proposals for presentations in the form of a 15-line abstract to the A3TS before 15/06/2011.

Form to be sent before 15/06/2011 to the A3TS - 71 rue La Fayette - 75009 PARIS

A3TS / AWT / AIM / SVW-ASTT / VWT / ASMET / ATZK – EUROPEAN DAYS
COMBINED TREATMENTS TO IMPROVE SURFACE PROPERTIES
22-23/03/2012 – Palais des Congrès de STRASBOURG

Last name: First name:

Company: Address:

Tel.: Email:

I am interested in this event.

I'd like to present a technical paper. Title:
